

# Card Security FAQ

## Why does Thanx need my card information?

- Thanx uses credit card information to make it seamless and easy to earn rewards without you having to do anything at checkout.
- Thanx never sees or stores your card information; instead your card information goes directly to your credit card provider and is communicated back to Thanx as an encrypted string of digits through Tokenization.

## Your credit card information is protected by Tokenization

### 1. How does Tokenization work?

### 2. How does Thanx automatically track my progress when I use a credit card?
